

# Fuel Economy references

## Up to 10% fuel savings

Combines eco with comfort: Pilotfish Fuel Economy. The smart driving application supports you reaching your environmental and economic goals. By reducing fuel consumption and saving carbon emissions, you will make an important step towards the future of mobility.

Fuel Economy is an eco-driving aid which measures excessive energy consumption and gives an instant feedback to the driver as well as a report to the management.

We have approximately 7 000 installed systems in the biggest public transport operators in Europe. Read why Keolis, Svealandstrafiken or Uddevalla Omnibus put its trust in us.

- **7 000 installations of Fuel Economy**
- **Saves up to 10% fuel per month:**
  - ~280 000 liters of fuel
  - ~740 t less CO<sub>2</sub> emissions
- **Experiences lower wear and tear, improved comfort and satisfied customer index**

The Econometer uses LEDs to give basic feedback.

A screen-based interface provides detailed feedback.
